

**INDEX****A**

## ABBREVIATIONS

1-3

## ALIGNMENT

ALIGNMENT OF CULVERTS, 6-6

ALLOWABLE WATER SURFACE ELEVATION,  
2-7ALTERNATE TYPES AND MATERIALS FOR  
DRAINAGE STRUCTURES, 2-11

Alternate Structure Types, 2-11  
 Corrugated Metal Pipe, 2-11  
 Thermoplastic Pipe, 2-11  
 Precast Structures, 2-11  
 Proprietary Items, 2-11

**B**

Backwater, 1-13

Bridge, 1-13

Buoyant Uplift, 6-3

**C**

## CAPACITY - CULVERT

Inlet Control, 6-27  
 Outlet Control, 6-13

## CHANGES TO DRAINAGE CONDITIONS, 2-2

Changes in Drainage Areas, 2-3  
 Changes in Permeability of Surfaces, 2-3  
 Changes in Channels, 2-3  
 Changes to Drainage Structures, 2-4

## CHANNELS, 4-1

## CHANNEL CAPACITY, 4-7

Channel Routing, 3-32

## CHANNEL STABILITY, 4-17

## COMPUTER PROGRAMS, 1-30

COORDINATION WITH OTHER GOVERNMENTAL  
AGENCIES, 2-5

Corrugated Metal Pipe, 2-11, 8-5

## CULVERTS, 6-1

**D**

## DEFINITIONS, 1-13

## DESIGN CRITERIA FOR ROAD DITCHES, 4-5

Allowable Water Surface and Recurrence Interval, 4-5  
 Ditch Lining and Stability, 4-5  
 Cross Section, 4-6  
 Minimum Grade, 4-6  
 Scour Protection for Highway Embankments, 4-6

## DESIGN PROCEDURE, 1-19

Design Storms, 3-20

DETENTION STORAGE DESIGN FOR CULVERTS,  
2-10

## DITCHES

Interceptor Ditches, 4-2  
 Ditch Lining and Stability, 4-5  
 Road Ditches, 4-2

Drainage Area Sheets, 1-23

## DRAINAGE CONDITIONS

CHANGES TO DRAINAGE CONDITIONS, 2-2  
 Changes in Drainage Areas, 2-3  
 Changes in Permeability of Surfaces, 2-3  
 Changes in Channels, 2-3  
 Changes to Drainage Structures, 2-4

## DRAINAGE POLICIES, 2-1

## DRAINAGE STRUCTURES

Alternate Structure Types, 2-11  
 MINIMUM SIZES FOR DRAINAGE STRUCTURES,  
2-12  
 END TREATMENTS FOR DRAINAGE STRUC-  
TURES, 2-13

**E**

End Treatments, 6-2

End Sections for Pipe Culverts, 6-3

End Treatments for Box Culverts, 6-4

**END TREATMENTS FOR DRAINAGE STRUCTURES, 2-13**

Embedded Culverts, 6-5

**EXAMPLES**

- Example: Design Flow by Rational Method, 3-6
- Examples: Design Flows from USGS Regression Equations, 3-18
- Example: Runoff Curve Number for Design Event, 3-30
- Example: Design of Road Ditch with Grass Lining, 4-21
- Example: Design of Road Ditch with Aggregate Lining, 4-26
- Example: Design of Road Ditch with Concrete Lining, 4-30
- Example: Design of Median Drainage, 5-10
- Example: Culvert Analysis for Outlet Control, 6-23
- Example: Analysis of a Pipe Culvert for Inlet Control, 6-35
- Example: Analysis of an RCB Culvert for Inlet Control, 6-38
- Example: Detention Storage Analysis of a Culvert, 6-43
- Example: Design of Street Drainage, 7-11
- Example: Design of a Storm Sewer, 7-19

**F****FLOOD HYDROGRAPH SIMULATION METHOD, 3-20**

- Overview, 3-20
- Computer Programs, 3-20
- Design Storms, 3-20
- Rainfall-Runoff Model, 3-22
- Streamflow Hydrographs, 3-31
- Channel Routing, 3-32
- Reservoir Routing, 3-34

**G**

General Procedure for Culvert Analysis, 6-11

Geometric Relationships for Trapezoidal Channels, 4-7

Grade (Alignment of Culverts), 6-8

Grade Control Structures, 4-2

**H**

Horizontal Alignment, 6-6

**HYDROLOGY, 3-1**

- HYDROLOGIC METHODS, 3-2
- RATIONAL METHOD, 3-3
- THREE-VARIABLE REGRESSION EQUATIONS, 3-9
- USGS REGRESSION METHOD FOR KANSAS, 3-13
- FLOOD HYDROGRAPH SIMULATION METHOD, 3-20

**I**

Interceptor Ditches, 4-2

**J****L****M****MANNING'S EQUATION - CHANNELS**

- Manning's Equation for Uniform Flow, 4-7
- Manning's Roughness Coefficient, 4-9
- Manning's Roughness Coefficients for Culverts, 6-19

Minimum Grade - ROAD DITCHES, 4-6

**MINIMUM SIZES FOR DRAINAGE STRUCTURES, 2-12****MEDIAN DRAINAGE, 5-1**

- TYPES OF MEDIAN DRAINS, 5-2
- Allowable Water Surface, 5-3
- Recurrence Interval, 5-3
- Minimum Grade, 5-3
- Median Cross Section and Depth, 5-3
- Temporary Erosion Protection, 5-3
- CAPACITY OF MEDIAN DRAINS, 5-5
- DESIGN PROCEDURE FOR MEDIAN DRAINAGE, 5-10

Multiple Barrel Culverts, 6-2

**N****O**

Outlet Control, 1-16, 6-13

**P**

Pipe Culverts, 6-27

PIPE INSTALLATION, 8-2

General Procedure, 8-2

Minimum Spacing, 8-2

Pipe Lengths, 8-2

Pipe Liners, 1-29

PLAN REQUIREMENTS, 1-23

Drainage Area Sheets, 1-23

Drainage Data Sheet, 1-25

Crossroad Pipes, 1-25

RCB Culverts and Extensions, 1-28

Detention-Storage Structures, 1-28

Road Ditches, 1-28

Storm Sewers, 1-28

Precast Structures, 1-28

Precast Structures, 1-28, 2-11

PROJECT PERMITS, 1-22

Proprietary Items, 2-11

**Q**

Q, 1-9

**R**

Rainfall Intensity, 3-4

RATIONAL METHOD, 3-3

Rational Formula, 3-3

Time of Concentration, 3-3

Runoff Coefficients, 3-5

RECURRENCE INTERVAL, 3-8

REFERENCES, 2-14, 3-35, 4-32, 5-49, 7-26, 8-38

Regression Equations for  $<30 \text{ mi}^2$ , 3-13

Regression Equations for  $\geq 30 \text{ mi}^2$ , 3-16

REINFORCED CONCRETE BOXES, 8-36

REINFORCED CONCRETE PIPE, 8-3

Reservoir Routing, 3-34

Road Ditches, 1-28, 4-2

Runoff Coefficients, 3-5

**S**

Scour Protection for Highway Embankments, 4-6

SITE APPLICATIONS, 4-2

Road Ditches, 4-2

Interceptor Ditches, 4-2

Grade Control Structures 4-2

Changes to Streams, 4-2

Streamflow Hydrographs, 3-31

STREET DRAINAGE, 7-2

Design Criteria, 7-2

Types of Inlets, 7-2

Location of Inlets, 7-3

Discharge Capacity of Gutter and Street, 7-3

Capacity of Inlets on Grade, 7-5

Capacity of Inlets in Sag Locations, 7-10

Discharge for Inlet Design, 7-11

STORM SEWERS, 7-15

Design Criteria, 7-15

System Layout, 7-15

Preliminary Design, 7-15

Hydraulic Grade Line and Final Design, 7-17

Example: Design of a Storm Sewer, 7-19

STRUCTURAL ASPECTS OF CULVERTS, 8-1

Superelevation in Bends, 4-15

System Layout, 7-15

**T**

Tailwater, 1-18

Tailwater Level, 6-13

THERMOPLASTIC PIPE, 8-35

THREE-VARIABLE REGRESSION EQUATIONS,  
3-9

Time of Concentration, 3-3

TYPES OF CHANNEL LININGS, 4-3

Types of Flow in Culverts, 6-11

TYPES OF MEDIAN DRAINS, 5-2
